# Reliability & efficiency down to a science.

Marine | RV | Industrial | Military | Street Lighting | Off-Grid

You paid for 140 Watts. Get your money's worth with Genasun. With the Genasun GV-10 MPPT controller, continuous power is yours for the taking. The only 10.5A 140W MPPT solar charge controller on the market today, the GV-10 extracts more power from any given panel than a PWM controller. And though PWMs may offer a lower controller cost, Genasun MPPT controller delivers more power – reducing the cost per watt by 10-30% and giving you more bang for your buck.

GV-10 | 10.5A @ 12V MPPT 140W

- 98% peak efficiency
- Built-in fuse
- Excellent low-light performance
- Ultra-fast true MPP Tracking
- Compact for easy installation
- No fans. No relays

Take advantage of Genasun's advanced MPPT technology and enjoy more reliable power from smaller panels.

+10% additional power in the summer. No panel is too hot to handle.

+30% more power on those shorter, colder winter days.

+50% increase in energy harvest from partially shaded panels.

Typical power gains from Genasun MPPT controllers vs the best PWM controllers available.
